Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Miller (U.S. 2,602,647).

Miller discloses a heat exchanger comprising:

- a core member (12) including a plurality of hot-side fluid or gas transport passages for a first fluid or gas therein;
- a plurality of cold-side fluid or gas transport passages for a second fluid or gas therein that is provided at a temperature less than that of the first fluid or gas;
- the hot-side and cold-side fluid or gas transport passages being in contact with one another to permit conductive heat transfer;
- manifolds connected to ends of the hot-side and cold-side fluid or gas passages to direct and receive the first and second fluids or gases into and from the respective hot-side and cold-side fluid or gas transport passages;
- a flow director (21) disposed within one of the manifolds to change the
